

# H<sup>OT</sup> WATER

## ON DEMAND

**Enjoy fast hot water delivery to faucets and showers, saving time and reducing hot water waste**

- **INSTANT HOT WATER** – Get hot water where you want it and when you need it
- **ACTIVATION FLEXIBILITY** – Choose the best activation method that meets your needs
- **WATER CONSERVATION** – Reduce water waste by not waiting for hot water, saving up to 12,000 gallons of water per year\*

*Plus, on-demand recirculation pumps can be used with any Rheem Tankless or Rheem Tank-Type water heater*

### DEMAND PUMP KIT – STANDARD

The standard on-demand recirculation pump is an easy install solution and perfect for new construction, meeting on demand activation regulations for new homes.

**APPLICATIONS** – New construction

**INSTALL LOCATION** – Next to the water heater

**ACTIVATION** – Wired push button (included), motion sensor or remote transmitter

**PLUMBING REQUIREMENTS** – Requires a dedicated return line

**COMPATIBILITY** – Tank-type and tankless water heaters

### DEMAND PUMP KIT – UNDER SINK

This under the sink option is a perfect solution for adding instant hot water to an existing water heater piping application.

**APPLICATIONS** – Retrofit and new construction

**INSTALL LOCATION** – Under sink cabinet of the fixture furthest from your water heater

**ACTIVATION** – Wired push button (included), motion sensor or remote transmitter

**PLUMBING REQUIREMENTS** – Uses existing cold water supply pipe as the return line – no dedicated return line required

**COMPATIBILITY** – Tank-type and tankless water heaters

**KIT: AP18403**

#### KIT CONTAINS

- 008-CT Taco Genie
- Wired push button
- Piping diagrams and instruction sheets for ease of installation

**KIT: AP18537**

#### KIT CONTAINS

- 008-CT Taco Genie
- Wired push button
- Piping diagrams and instruction sheets for ease of installation
- + 2 Tee fittings
- + 2 Corrugated flex tubes

### MAX. PIPE LENGTHS

- 400 ft. total pipe length – 3/4" copper pipe
- 100 ft. total pipe length – 1/2" copper pipe

\*Savings per News Bulletin released by the United States Department of Energy / Oak Ridge National Laboratory, November 2002 study on water and energy savings in residential homes using hot water recirculating system.
