

MODEL: SH2V AIR HANDLERS

Designed with energy efficiency and quiet operation, the Russell™ By Rheem SH2V Air Handler provides you with a higher level of comfort.

- **Reduce energy bills** with the SH2V Air Handler. The unit is designed to exceed minimum efficiency standards and delivers savings every time it is in use.
- **Efficient operation** is what you get thanks to the compact design and sound-control elements, and the unit is convertible to easily adapt to various system requirements.
- **Quality construction** delivers quiet operation and long lasting performance.

MODEL: SH2V AIR HANDLERS

Energy savings. The high-efficiency, variable-speed blower motor used on the SH2V, when matched with a two-stage air conditioner or heat pump, will run at a lower speed the majority of the time. This provides even temperatures so there is no need to continuously adjust your thermostat—reducing your energy usage.

Designed for performance. Russell™ By Rheem air handlers have a factory installed indoor aluminum coil, which is the key component for your air handler. The coil is essential to humidity control and improved system performance, and the high-quality standards used in manufacturing result in fewer maintenance calls. Other quality features include a new lanced fin design and condensate drain pan. The corrosion-resistant aluminum endplates keep your unit looking as good as it runs.

Quiet operation. SH2V Air Handlers are designed with a sturdy steel cabinet and one inch of foil-faced insulation, offering excellent thermal and sound insulation.

Russell By Rheem is a new name in HVAC backed by 70+ years in the temperature-control industry developed to meet your needs and budget through practical, dependable HVAC products—Air Conditioners, Heat Pumps and Gas & Electric Furnaces—offering great performance with only the bells and whistles that matter, to keep your family comfortable day after day.
