# MODEL: RACA15

## PACKAGE AIR CONDITIONERS

**Industry-leading features** are the key to your comfort at home. Our package air conditioners are designed with a micro-channel refrigerant system, which includes all-aluminum evaporator and condenser coils that fight corrosion and keep your unit operating smoothly. Another unique aspect of your RACA15 model is a water management design that diverts water away from the critical components of your air conditioner and prevents leaks and other potential problems.

Added louvered coil protection prevents damage to the coil fins for longer life and better overall performance. And special base rails elevate the bottom of the unit off the ground and away from corrosive condensation.

**Quiet operation.** The combination of the durable cabinet, large fan, scroll compressor and elevated base pan all contribute to quiet, dependable operation.

Russell™ By Rheem is a new name in HVAC backed by 70+ years in the temperature-control industry developed to meet your needs and budget through practical, dependable HVAC products—Air Conditioners, Heat Pumps and Gas & Electric Furnaces—offering great performance with only the bells and whistles that matter, to keep your family comfortable day after day.
