Simple Comfort
for Every Season

Whirlpool® Heat Pump
WLP15AY

LOW GWP Refrigerant

Whirlpool® HVAC Line

Get smart, hassle-free comfort season after season with the ENERGY STAR® certified Whirlpool® WLP15AY Heat Pump. It offers super-efficient technology to keep energy bills low and home comfort high.

ENERGY STAR

WhirlpoolHVAC.com

Innovation You Can Count On

Patented industry-first features and advanced design make the Whirlpool WLP15AY a smart choice.

Peace-Of-Mind Performance

Rest easy, you're covered by one of the best warranties in the industry[1]—10 Year Conditional Parts.

Lower Environmental Impact

The 7mm condenser coil[2] reduces the amount of refrigerant required by up to 15%, lowering the amount of greenhouse gases emitted

Reduced Emissions

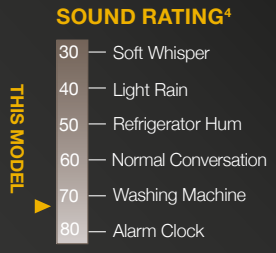

Households generate 72%[3] of greenhouse gas emissions, so switching to a heat pump can make a big difference for the environment—today.

High-Strength Curb Appeal

Curved louvered panels and rugged corner posts provide excellent protection to internal components, while modern cabinet aesthetics, including the corrosion-resistant composite base pan and powder coat paint system, allow your unit to put its best face forward for years to come.

Quiet Operation

Efficient home comfort shouldn't be noisy. That's why our heat pumps are designed with acoustics in mind. Integrated sound-dampening features such as refrigerant tubing design, fan blade approach, composite base pan and innovative compressor and drive technologies let you enjoy more efficiency—and less noise.

Ensuring You Enjoy Both Savings and Efficiency[5]

Earning ENERGY STAR® recognition means products meet strict energy efficiency guidelines set by the U.S. Environmental Protection Agency. ENERGY STAR certified heating and cooling equipment can enhance the comfort of your home while saving energy—which saves money on utility bills and protects our climate by reducing harmful carbon pollution and other greenhouse gases.

Designing with Low GWP

For 2025, the Environmental Protection Agency (EPA) has set a global warming potential (GWP) limit of 700 for refrigerant used in heating and cooling systems. This new requirement will result in a 78%[6] lower GWP than previous-generation refrigerants—with only minimal changes to system installation. For us, this is another step toward reducing greenhouse gas emissions, while still delivering an exceptional level of energy efficient, dependable comfort.

Features at a Glance

Cooling Efficiencies Up To:
16 SEER2 / 11.7 EER2 / 8.1 HSPF2

Refrigerant Type: R-454B

Nominal Sizes: 1.5 to 5 Tons

Cooling & Heating Capacities:
17.1 to 57 kBTU

Sound Rating[4]: As low as 73 dB

Compressor Type: Two-Stage

Condenser Coil Type: 7mm

Feature Highlights

Expanded Valve Space: Provides a minimum working area of 27-square in.

Easy Service Access: 15 in. wide industry leading corner service access, two-fastener removable corner and easily removable individual louver panels

Refrigerant Detection System™*[7]: Integrated, patented design providing system protection and homeowner peace-of-mind with low GWP refrigerant monitoring

Limited Warranty[1]:
Conditional Parts – 10 Years
(registration required)
