50 Tall + Water Heater Booster **= 80 Tall** Performance

80 Gallon + Water Heater Booster **= 120 Gallon** Performance

[1]Water Heater Booster can increase the hot water delivery capacity of electric water heater tanks to deliver water at 98°F or hotter by as much as 60% for a 2.5 GPM standardshowerhead. Standard showerheads use 2.5 gallons of water per minute (GPM) www.epa.gov/watersense/showerheads. [2]Water Heater Booster can extend the duration of delivery of water from a 40-gallon or higher capacity electric standard water heater tank at 98°F or hotter to 1.5 and 2.5 GPM showerheads by 19.6 and 15.1 minutes,respectively. According to testing by an independent test agency.
