Help customers enjoy instantaneous, continuous hot water while saving on energy costs. Go to Rheem.com/TESelect for a solutions guide to recommending the right model for their needs.

- 1 Consider customer location
- 2 Assess their hot water needs
- 3 Review inlet temperature and recommend the best model for your customer

Tankless Electric Selling Points

Performance

ON-DEMAND, CONTINUOUS HOT WATER—Instantly provides ample hot water so there's no wait, saving time and water

ENERGY & COST SAVINGS—Heats water only when it is needed for savings of up to 50% when used in a point-of-use application, or 34% when used as a whole-home solution¹

EASY TO ADJUST—Electronic temperature control adjustable in 1° increments from 80°-140°F with easy-to-read display

Peace-of-Mind

GREAT INVESTMENT & VALUE—Energy cost savings and a 5-year heating chamber warranty with a 1-year parts, limited warranty²

EASY TO MAINTAIN—Durable, easy-to-replace heating elements

Installability

SPACE SAVINGS—Small, compact design fits perfectly in tight places like under cabinets in bathrooms

EASY INSTALLATION—Compatible with ½ and ¾-inch water connectors for flex hose installation; no venting or T&P valve required

ADD-ON SOLUTION—Perfect as an add-on to recommend for large homes, homes with an undersized main system or homes undergoing renovations where point-of-use heaters could improve comfort and convenience while helping you improve your sale

¹According to the Department of Energy's "Advantages of Tankless or Demand-Type Water Heaters," tankless water heaters can provide energy savings of up to 50% on water heating costs when installed at each hot water outlet. When used as a single tankless model to supply hot water to a residence with up to 2 bathrooms in some climates, it can provide up to 34% energy savings. ²See the Warranty Guide on Rheem.com for addition information.
