MODEL: RACA14 PACKAGE AIR CONDITIONERS

Industry-leading features are the key to your comfort at home. Our Package Air Conditioners are designed with a micro-channel refrigerant system which includes all-aluminum evaporator and condenser coils that fight corrosion and keep your unit operating smoothly.

Another unique aspect of your RACA14 model is a water management design that diverts water away from the critical components of your air conditioner and prevents leaks and other potential problems.

Added louvered coil protection prevents damage to the coil fin for longer life and better overall performance.

Quiet Operation. The combination of the durable cabinet, large outdoor fan, scroll compressor and elevated base pan all contribute to quiet, dependable operation. Special base rails elevate the bottom of the unit off the ground and away from corrosive condensation.

Sure Comfort® is a new name in home comfort offering tried and true air conditioners, heat pumps, furnaces and air handlers and package units to meet the needs of your family and your budget. With advanced features, impressive performance and great warranties that all come standard, you can enjoy solutions that keep your family comfortable every day.
