

# HotMax™

A complete dispensing system for near-boiling water

**Introducing HotMax, a complete solution providing endless, near-boiling water designed for the rigors of commercial foodservice applications.**

HotMax integrates Eemax® tankless heating technology with a commercial grade faucet to deliver 480, 8 oz. cups per hour. Heat Primed Technology™ ensures hot water from the first cup to the last—with no downtime. The sleek, chrome faucet features our patent pending SteamShield™, which provides near-boiling water in a steady flow for operator safety.

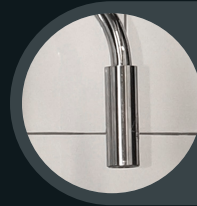

Use HotMax for these food and beverage preparation activities:

- Steep hot beverages (coffee, tea, hot chocolate)
- Prepare doughs, soups, sauces, gravies, and mixes
- Rethermalize packaged products
- Reconstitute dried foods

System includes heater unit, faucet, proprietary tube for outlet, and safety labels. For more HotMax specifications, visit **EEMAX.COM**.

Tankless technology from the water heating experts at Eemax

SteamShield delivers water in a safe and steady flow.

Adjustable temperature control dial with 11 settings
