- ✓ Universal mounting
- ✓ Easy installation
- ✓ Customised pressure relief valve (PRV)

### Why Rheem is your choice

- Protection against corrosion with the exclusive enamel tank
- Incoloy 840 immersion heating element to resist dry firing
- Pressure relief valve provides protection against excessive water pressure
- Thermal cut out once the heater reaches the preset temperature to prevent scalding
- Restored anode rod protects the inner tank from corrosion
- High density CFC free polyurethane insulation between inner tank and epoxy coated steel jacket provides maximum heat retention
- Tested to IEC60335-2-21 Standard and approved by Enterprise Singapore
