Recirculation Pump Kit (Timer Based):

Stop waiting for water to heat up and watching money go down the drain. The Recirculation Pump Kit from Richmond provides immediate hot water using the Tankless water heater controls. A timer setting can be activated to run every so often (for example, every 30 minutes) to keep hot water flowing through the homes pipes and ready when needed.

Built-in functionality on the water heater for two different modes of operation allows the comfort of the Performance mode or save on energy costs using the Energy Saver mode. Installation has also been made easier with an internal check valve built into the pump, no external plug to fix into a wall outlet, and no need to install an aqua stat.

Recirculation Timer Cycles

WATER HEATER THERMOSTAT SET TEMPERATURE °F	TYPICAL PUMP ON INTERVALS (MINUTES)	
	PERFORMANCE MODE	ENERGY SAVER MODE
140	15	30
135	15	30
130	15	30
125	15	30
120	16	31
118	17	33
116	18	35
114	19	38
112	20	40
110	22	44
108	24	47
106	26	51
104	28	56
102	31	63
100	35	69

*All models are available in Natural Gas and Propane (LP). For Propane replace "N" with "P" in model number. Example RMTG-95DVLN-1.
