RKHL SERIES STANDARD FEATURES INCLUDE:

- R-410A HFC refrigerant
- Complete factory charged, wired and run tested
- Scroll compressors with internal line break overload and high-pressure protection
- RKHL-C120 has a single stage compressor.
- RKHL-D120 has dual independent compressors.
- Downflow only
- TXV refrigerant metering system
- High Pressure and Low Pressure/Loss of charge protection standard on all models
- Solid Core liquid line filter drier
- Single slab, single pass designed evaporator and condenser coils facilitate easy cleaning for maintained high efficiencies
- · Cooling operation up to 125 degree F ambient
- Foil faced insulation encapsulated throughout entire unit minimizes airborne fibers from the air stream
- Hinged major access door with heavy-duty gasketing, 1/4 turn latches and door retainers
- Slide Out Indoor fan assembly for added service convenience
- Powder Paint Finish meets ASTMB117 steel coated on each side for maximum protection G90 galvanized
- One piece top cover and one piece base pan with drawn supply and return opening for superior water management
- Forkable base rails for easy handling and lifting
- Single point electrical and gas connections
- Internally sloped slide out condensate pan conforms to ASHRAE 62 standards

- High performance belt drive motor with variable pitch pulleys and quick adjust belt system
- Permanently lubricated evaporator, condenser and gas heat inducer motors
- Condenser motors are internally protected, totally enclosed with shaft down design
- · 2 inch filter standard with slide out design
- Two stage gas valve, direct spark ignition, and induced draft for efficiency and reliability
- Tubular heat exchanger for long life and induced draft for efficiency and reliability
- · Solid state furnace control with on board diagnostics
- · 24 volt control system with resettable circuit breakers
- Colored and labeled wiring
- Copper tube/Aluminum Fin indoor coils with all aluminum MicroChannel condenser coil
- Molded compressor plug
- Factory Installed ClearControl[™], a Direct Digital Control (DDC) and sensors which can connect to LonWorks[™] or BACnet[®] BAS systems for remote monitoring and control
- Pressure sensors provide refrigerant pressures, superheat, and subcooling on the ClearControl[™] display
- H₂AC Package Unit *featuring eSync Integration Technology* includes water circulation pump, refrigerant-to-water heat exchanger, and *eSync Integration Technology* control board for heat recovery during air conditioning mode to preheat potable water.
