Peace-Of-Mind Performance

Relax, you're covered by a dependable warranty¹ — 10 Year Conditional Parts.

Lower Environmental Impact

The 7mm condenser coil² reduces the amount of refrigerant required by up to 15%, lowering the amount of greenhouse gases emitted while contributing to our sustainability goal of a 50% reduction in our greenhouse gas footprint. A win for all of us.

Quiet Operation

Efficient home comfort shouldn't be noisy. That's why our heat pumps are designed with acoustics in mind. Sound-dampening features such as refrigerant tubing design, fan blade approach, one-piece drawn and painted base pan and innovative compressor and drive technologies ensure that as efficiency increases, sound levels remain low.

SOUND RATING³

Reduced Emissions

Households generate 72%⁴ of greenhouse gas emissions, so switching to a heat pump can make a big difference for the environment—today.

Durable Curb Appeal

Louvered side panels provide excellent protection to internal components, while modern cabinet aesthetics, including the powder coat paint system and one-piece drawn and painted base pan, prevent corrosion—allowing your unit to put its best face forward for years to come.

FEATURES AT A GLANCE

Cooling & Heating Efficiencies Up To:

14.3 SEER2 / 10.4 EER2 / 7.6 HSPF2

Nominal Sizes: 1.5 to 5 Tons

Cooling Capacities: 17.1 to 55.5 kBTU

Sound Rating³: As low as 72 dB

Compressor Type: Single-Stage

Condenser Coil Type²: 7mm

FEATURE HIGHLIGHTS

Expanded Valve Space:

Provides a minimum working area of 27-square in.

Easy Service Access:

15 in. wide industry leading corner service access, two-fastener removable corner and easily removable louver panels

Limited Warranty⁴:

Conditional Parts – 10 Years
(registration required)
