

DUCTLESS MINI-SPLIT  
HEAT PUMP SYSTEMS

# RELIABLE COMFORT FOR ANY SPACE, ANY SEASON

Ground-breaking Ruud® Mini-Split Heat Pumps deliver both heating and cooling for year-round comfort in most climates. A simple push of a button on the remote control allows you to switch from heating to cooling (or vice versa) automatically.

## Ruud® Ductless Mini-Split Heat Pump Systems

Single Zone Efficiencies up to 33 SEER / 14.2 HSPF

Multi-Zone Efficiencies up to 19.7 SEER / 10.3 HSPF

### Ductless Technology

A ready alternative in areas of the home where traditional duct systems may not be an option. Set up and installation is quick and easy and, without taking up closet or attic space.

### Total Home Comfort

Install one to five indoor units connected to one outdoor unit. Indoor units vary by size and each creates its own "zone" of comfort allowing you to heat or cool individual rooms, hallways and open spaces.

### Year-Round Savings

Provide both heating and cooling for year-round comfort in most climates. The high energy efficiencies of ductless Ruud Ductless Mini-Split Systems slash utility bills by up to 24%<sup>2</sup>.

## Customized Total Whole Home Comfort

Ruud® Ductless Mini-Split Heat Pump Systems are some of today's most advanced forms of heating and cooling. One outdoor unit can operate up to five indoor units, simultaneously providing just the right amount of comfort control to each area. Ruud brand systems are quiet as well as highly energy efficient.

## Inverter Technology

The inverter technology found in Ruud Ductless Systems is like cruise control for your home comfort. The compressor only runs as fast as needed to handle your cooling or heating demands. This means your Ductless System can handle greater extremes in temperature, is smoother and more stable in operation, and is able to reach the desired temperature more quickly than conventional ductless heat pumps.

## Reliably Comfortable

For high-efficiency comfort and peace-of-mind at an affordable price, the Ruud Ductless Mini-Split Heat Pump System is your best choice. Find your local Ruud independent contractor today at [Ruud.com](http://Ruud.com).

<sup>1</sup>Proper sizing and installation of equipment is critical to achieve optimal performance. Split system air conditioners and heat pumps must be matched with appropriate indoor components to meet ENERGY STAR criteria. Ask your contractor for details or visit [EnergyStar.gov](http://EnergyStar.gov).  
<sup>2</sup>Savings may vary based on model selected, hours of operation and geographical location. Example given based on 33-SEER system versus 14-SEER system. <sup>3</sup>Register at [RegisterMyUnit.com](http://RegisterMyUnit.com). For complete details, contact your local Contractor, or go to [Ruud.com](http://Ruud.com) for a copy of the product warranty certificate.
