

The new degree of comfort.®

Residential Electric
Professional **Classic**® Water Heaters

Professional **Classic**® electric water heaters are engineered for longer life – resisted heating elements and premium grade anode rod

Efficiency

- Standby watts loss 56 - 97
- Isolated tank design reduces conductive heat loss
- Resisted copper upper element and resisted Lifeguard™ stainless steel lower element to prolong anode rod and tank life

Performance

- FHR: 42 - 99 US gallons, based on gallon capacity
- Recovery rate is 21 US gallons at a 90 degree Fahrenheit rise

Longer Life

- Premium grade anode rod provides long-lasting tank protection

Features

- Electric junction box located above heating elements for easy installation
- Over-temperature protector cuts off power in excess temperature situations
- Automatic thermostat keeps water at desired temperature

Plus...

- EverKleen® self cleaning device fights harmful sediment build-up with a high-velocity spiraling water stream – helps operating efficiency by saving energy, money and improving tank life
- Enhanced-flow brass drain valve
- Temperature and pressure relief valve included
- Low lead compliant

Warranty

- 6-Year limited tank and parts warranty*
- With ProtectionPlus™ the 6-year limited tank warranty becomes 10-year ProtectionPlus™ – order part number SP20904 (6 pack only)
- With ProtectionPlus™ the 6-year limited tank warranty becomes 8-year ProtectionPlus™ – order part number SP20081 (6 pack only)

*See Residential Warranty Certificate for complete information

Professional **Classic**®

30 to 60-Imperial Gallon
Capacities
120 and 240 Volt AC/Single Phase
Double Element Models
Electric

*FHR values are for information purposes only and therefore not listed with Natural Resources Canada. For efficiency measure kindly refer to Standby Watt Loss values.

• Special Wiring Options – A limited number of special wiring options are available. Consult factory for price and availability.

• All models equipped with heat traps.

† Complies with ON/BC/QC energy efficiency requirements. ON/BC/QC 40 imperial gallon top inlet models will have side T&P.

**Recovery = wattage/2.42 x temp. rise °F.
Example: 4500W = 21 GPH
2.42 x 90°

**Recovery calculations used are based on 4500 watt elements used in non-simultaneous operation.
