PACKAGE GAS ELECTRIC UNITS

Make yourself at home with the dependable Russell[™] By Rheem RGEA14. This package gas electric unit is designed for durable, long-lasting performance and lower energy bills.

- **Rest assured,** our package gas electric units boast a list of features that ensure great performance to keep your home comfortable for years to come. We also offer some of the best warranties in the industry.
- **Quieter operation.** The combination of a durable cabinet design, scroll compressor and an elevated base pan, wrap up this unit to give you the quiet and comfort you deserve.

MODEL: RGEA14 PACKAGE GAS ELECTRIC UNITS

Dependable. Our micro-channel refrigerant system includes all aluminum evaporator and condenser coils that fight corrosion and keep your unit operating at peak performance. Our direct spark ignition (DSI) with remote flame sensing provides unmatched reliability.

A unique water management design diverts water away from critical components, preventing leaks and other potential problems. Louvered coil protection prevents damage to the coil fin which keeps the coil running longer for an overall better performing unit.

The RGEA14 also features a tubular heat exchanger design for added efficiency and durability. The 100% scroll compressor boosts performance and efficiencies even more.

Efficient operation is important and that is why our micro-channel refrigerant system is a plus. Micro-channel technology is responsible for superior heat transfer capabilities and uses up to 58% less refrigerant than standard copper tube aluminum fin coil models.

Russell™ By Rheem is a new name in HVAC backed by 70+ years in the temperature-control industry developed to meet your needs and budget through practical, dependable HVAC products—Air Conditioners, Heat Pumps and Gas & Electric Furnaces—offering great performance with only the bells and whistles that matter, to keep your family comfortable day after day.
