

RULE COMFORTABLY IN EVERY SEASON

Air Heat Pump
WP15AY

VERSUS®

WeatherKing® Versus® Line

Reign supreme in any season with the heating and cooling capabilities of the WeatherKing Versus Line WP15AY Heat Pump. Advanced technology combines with high efficiencies to keep your castle consistently comfortable—and your energy bills consistently low.

VERSUS[®]

Peace-Of-Mind Performance

Relax, you're covered by a dependable warranty¹ — 10 Year Conditional Parts.

Lower Environmental Impact

The 7mm condenser coil reduces the amount of refrigerant required by up to 15%, lowering the amount of greenhouse gases emitted while contributing to our sustainability goal of a 50% reduction in our greenhouse gas footprint. A win for all of us.

Reduced Emissions

Households generate 72%² of greenhouse gas emissions, so switching to a heat pump can make a big difference for the environment—today.

Durable Curb Appeal

Louvered panels and rugged corner posts provide excellent protection to internal components, while modern cabinet aesthetics, including the powder coat paint system and one-piece drawn and painted base pan, prevent corrosion—allowing your unit to put its best face forward for years to come.

Quiet Operation

Efficient home comfort shouldn't be noisy. That's why our heat pumps are designed with acoustics in mind. Sound-dampening features such as refrigerant tubing design, fan blade approach, one-piece drawn and painted base pan and innovative compressor and drive technologies ensure that as efficiency increases, sound levels remain low.

SOUND RATING³

Among Heat Pumps, This One's A Star⁴

Earning ENERGY STAR[®] recognition means products meet strict energy efficiency guidelines set by the U.S. Environmental Protection Agency. ENERGY STAR certified heating and cooling equipment can enhance the comfort of your home while saving energy—which saves money on utility bills and protects our climate by reducing harmful carbon pollution and other greenhouse gases.

Designing for Sustainability with Low GWP

For 2025, the Environmental Protection Agency (EPA) has set a global warming potential (GWP) limit of 700 for refrigerant used in heating and cooling systems. This new requirement will result in a 78%⁵ lower GWP than previous-generation refrigerants—with only minimal changes to system installation. For us, this is another step toward our ongoing sustainability goal of reducing greenhouse gas emissions, while still delivering an exceptional level of energy-efficient, dependable comfort.

FEATURES AT A GLANCE

Cooling & Heating Efficiencies Up To:

15.2 SEER₂ / 11.7 EER₂ / 7.8 HSPF₂

Refrigerant Type: R-454B

Nominal Sizes: 1.5 to 5 Tons

Cooling & Heating Capacities:

17.1 to 57 kBtu

Sound Rating³: As low as 73 dB

Compressor Type: Two-Stage

Condenser Coil Type: 7mm

FEATURE HIGHLIGHTS

Expanded Valve Space:

Provides a minimum working area of 27-square in.

Refrigerant Detection System^{TM6} –

Integrated, patented design providing system protection and homeowner peace-of-mind with low GWP refrigerant monitoring

Limited Warranty¹:

Conditional Parts – 10 Years
(registration required)
