## Warranty<sup>3</sup>

- Standard Limited Warranty: Parts Five (5) Years, Compressor Seven (7) Years
- Warranty Extension: The Standard Limited Warranty covering parts and the compressor will be extended to a period of ten (10) years under specific conditions and online registration is required.

pumps must be matched with appropriate coil components to meet ENERGY STAR® criteria. Ask your contractor for details or visit EnergyStar.gov. <sup>2</sup>Savings may vary based on model selected, hours of operation and geographical location. Example given based on 33-SEER system versus 14-SEER system. <sup>2</sup>For complete details of the limited and conditional warranties, including applicable terms and conditions, contact your local contractor or go to Ruud.com for a copy of the product warranty certificate Conditional warranties must be registered through RegisterMyUnit.com.

5600 Old Greenwood Rd Fort Smith, AR 72908

**Ductless Mini-Split Heat Pump Systems** 

# COMFORT COVERED

Ruud® Ductless Mini-Split Heat Pump Systems provide both heating and cooling for year-round comfort. Their efficiency, versatility and simplicity make them an ideal choice for keeping rooms, spaces and homes comfortable.

Ruud.com

# RUUD ULTRA™ SERIES DUCTLESS MINI-SPLIT SYSTEMS

Single-Zone Efficiencies up to: 33 SEER / 18 EER / 14.2 HSPF Multi-Zone Efficiencies up to: 21.5 SEER / 13.5 EER / 10.3 HSPF

#### **Ductless Technology**

Ruud Ductless Mini-Splits are a convenient alternative in areas of the home where traditional ducted systems may not be an option. Setup and installation are quick and easy and won't take up closet or attic space.

#### Year-Round Savings & Efficiency

They provide both heating and cooling for your home year-round. The high energy efficiencies of ductless mini-split systems slash utility bills by up to 24%².

#### **Customized Comfort**

With ductless mini-splits, one to five indoor units can be installed and connected to one outdoor unit. Indoor units vary by size, and each creates its own "zone" of comfort allowing you to heat or cool individual rooms, hallways and open spaces.

# Get Comfortable—Wherever and Whenever

## **Efficiency**

#### **Energy Savings**

Ductless mini-split systems save energy by drawing heat from the air outside and using it to heat your home. During summer, the process is reversed to cool your home. The result is efficiency that rivals traditional ducted systems and delivers up to  $24\%^2$  utility bill savings.

#### **Inverter Technology**

Ruud® Ductless Mini-Split Systems deliver constant comfort using inverter technology. Inverter technology is like cruise control for your heating or cooling system. Compressors only run as fast as they need to maintain the comfort setting you choose.

#### **ESP Technology**

Energy Saving Program (ESP), available on certain models saves energy by sensing whether or not the room is occupied. If a space is left without turning the unit off, ESP knows that it is unoccupied, and 20 minutes later, temperature is adjusted accordingly until someone returns to the room.

#### **High Performance Heating**

Even when it's bitterly cold outside, you're comfortable inside. Standard systems continue to deliver warm, comfortable air down to -5°F outside temp. Low-temp models work down to -15°F.

# **Individual Zoning**

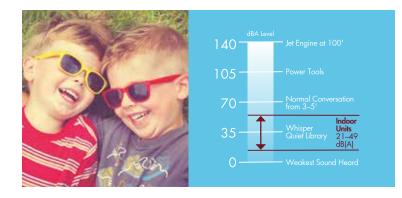

Delivering personalized whole-home comfort, Ductless Mini-Split Heat Pump Systems are some of today's most advanced forms of heating and cooling. One outdoor unit can operate up to five indoor units.

#### **Each Indoor Unit Can:**

- Operate independently via remote control
- Supply both heating and cooling
- Provide high energy efficiencies
- Operate quietly
- Offer rebates

# **Quiet Operation**

Ruud ductless systems are so quiet, you won't even know they're on. You can sleep well at night in a comfortable, peaceful environment. Ruud Ultra™ Series wall mount units feature Quiet Mode—an extraquiet fan speed to ensure you are not disturbed.

# Versatility

Ductless mini-split systems work where traditional systems might not be an option:

- Older homes where ducting isn't possible
- Garages, workshops, sheds, additions and attics
- Rooms not covered by or under-served by a ducted system

Ductless systems are also an efficient heating and cooling solution for electrically heated homes. They are easy to operate, quiet and provide substantial savings.

Single-zone for one room or multi-zone for a whole home (up to five rooms)

### **Indoor Unit Options**

#### Wall Mounted

 Mounts high on a wall, out of sight and does not require ductwork, increasing energy efficiency

#### Ploor Mounted

• Ideal for residential radiator replacements or any room with limited upper wall space, like a kitchen or sunroom

#### Slim Duct

 Mounted in a ceiling or in a framed enclosure below a ceiling, slim duct units are concealed and out of sight

#### 4 Compact Cassette

• Extremely discreet, with only the grille showing in the ceiling, cassettes use the latest powerful turbo fan technology to distribute the conditioned air evenly
