

IDEAL COMFORT WHEN AND WHERE YOU WANT IT

In many homes, adjusting the thermostat to make one area more comfortable can result in other areas becoming less comfortable. The EcoNet® Zoning System uses dampers in the ductwork to regulate and redirect air to specific areas (or zones) of your home, providing independent control over heating, cooling and humidity in up to six (6) zones for ideal comfort.

INTELLIGENT ENERGY SAVINGS

An EcoNet Zoning System also enables you to create unique schedules for each zone to reduce heating and cooling in unoccupied areas of your home, saving money on energy cost.

A zoning system is good for homes with:

- Two or more floors
- Hot and cold spots
- Unoccupied Rooms

CONVENIENT CONTROL

Complete control at home and on-the-go.

Set the temperature and manage airflow directly from the intuitive touchscreen control within each zone.

Or, manage it all using the EcoNet App.

Zoning also works with Alexa-enabled devices for fast, hands-free voice control. Just ask "Alexa, what's the home temperature?" to easily manage your comfort.

Download the app at Rheem.com/mobile
