

A COOLER CASTLE AWAITS

Air Conditioner
WA15AY

VERSUS®

WeatherKing® Versus® Line

The WeatherKing Versus Line WA15AY Air Conditioner is ENERGY STAR® certified and makes it easy to keep your castle consistently comfortable. It's designed for energy-efficient performance that saves you money while delivering peace of mind.

VERSUS[®]

Innovation You Can Count On

Patented industry-first features and advanced design make the WeatherKing[®] Versus[®] WA15AY a smart choice.

Peace-Of-Mind Performance

Relax, you're covered by a dependable warranty¹—10 Year Conditional Parts.

Lower Environmental Impact

The 7mm condenser coil reduces refrigerant requirements up to 15%. This lowers the amount of greenhouse gases emitted while contributing to our sustainability goal of a 50% reduction in our greenhouse gas footprint. A win for all of us.

Durable Curb Appeal

Louvered side panels provide excellent protection to internal components, while modern cabinet aesthetics, including the powder coat paint system and one-piece drawn and painted base pan, prevent corrosion—allowing your unit to put its best face forward for years to come.

Quiet Operation

Efficient home comfort shouldn't be noisy. That's why our air conditioners are designed with acoustics in mind. Integrated sound-dampening features such as refrigerant tubing design, fan blade approach, a one-piece drawn base pan and innovative compressor and drive technologies let you enjoy more efficiency—and less noise.

SOUND RATING²

Among Air Conditioners, This One's a Star³

Earning ENERGY STAR[®] recognition means products meet strict energy efficiency guidelines set by the U.S. Environmental Protection Agency. ENERGY STAR certified heating and cooling equipment can enhance the comfort of your home while saving energy—which saves money on utility bills and protects our climate by reducing harmful carbon pollution and other greenhouse gases.

Designing for Sustainability with Low GWP

For 2025, the Environmental Protection Agency (EPA) has set a global warming potential (GWP) limit of 700 for refrigerant used in heating and cooling systems. This new requirement will result in a 78%⁴ lower GWP than previous-generation refrigerants—with only minimal changes to system installation. For us, this is another step toward our ongoing sustainability goal of reducing greenhouse gas emissions, while still delivering an exceptional level of energy-efficient, dependable comfort.

FEATURES AT A GLANCE

Cooling Efficiencies Up To:

15.2 SEER₂ / 12 EER₂

Refrigerant Type: R-454B

Nominal Sizes: 1.5 to 5 Tons

Cooling Capacities: 17.1 to 57 kBTU

Sound Rating²: As low as 69 dB

Compressor Type: Single-Stage

Condenser Coil Type: 7mm

FEATURE HIGHLIGHTS

Expanded Valve Space –

Provides a minimum working area of 27-square inches

Refrigerant Detection System⁵ –

Integrated, patented design providing system protection and homeowner peace-of-mind with low GWP refrigerant monitoring

Limited Warranty⁴:

Conditional Parts – 10 Years
(registration required)
