Note: Vent pipe size should not be mixed for venting these water heater. Use same diameter pipe for all venting of the unit.
All power direct models can use $\mathbf{2}^{\prime \prime}$ concentric venting only as listed in the above chart.
2 " Concentric vent can only be used with $2^{\prime \prime}$ rigid piping. DO NOT mismatch concentric vent terminations with different rigid piping as it may cause the heater to malfunction or cause a lock-out condition unless specifically mentioned.
$3^{\prime \prime}$ Concentric vent may be used with $3^{\prime \prime}$ and 4 " venting.
