

Introducing the New!

HYBRID ELECTRIC HEAT PUMP DUCT DIVERTER

Heat pump water heaters exhaust cool, dehumidified air as part of normal operation. Patented Heat Pump Water Heater Duct Diverter maximizes seasonal energy savings by redirecting the exhaust air. In warmer months (Summer setting), the cool exhaust air ducts into the living space to assist the air conditioning. In colder months (Winter setting) the cool air ducts out of the home.

Part number
AP23528

IMPORTANT: Thoroughly read all installation instructions included with diverter. Richmond recommends installation by a licensed contractor and is not liable for any damages or defects resulting from improper installation.
