

Medium duty gas commercial water heaters feature a compact design for greater installation flexibility in tight retrofit applications

Features and Benefits

The tighter the commercial retrofit, the more you will appreciate how this water heater's compact size simplifies installations.

Space Saver Design

Short heights and narrow jacket diameters offer the ultimate in installation flexibility.

Patented Technology

Proprietary steel formulation with a unique coat of high temperature porcelain enamel to maximize corrosion resistance resulting in a superior tank design.

Patented Anode Rods

Magnesium anode rods are used to ensure corrosion resistance for a long tank life.

Efficiency

Rigid foam insulation provides superior insulating qualities, improves efficiency and reduces operating costs. Our patented process of injecting foam into the insulating cavity adds additional durability.

Automatic Controls

Control system is designed to shut off gas if the pilot flame is extinguished. Relighting is a safe, easy procedure. Thermostat settings to 160°F. A built-in gas pressure regulator assures even gas flow.

CSA/ASME Rated T&P Valve

Factory installed relief valve

Full Port, Full Flow Brass Drain Valve

Factory installed brass drain valve allows for faster draining and servicing.

High Altitude Compliant

Some models are certified for applications up to 8,500 feet above sea level. Please consult factory for certification requirements.

Warranty

3-Year limited tank warranty

See Commercial Warranty Certificate for complete information

Safety and Construction | These products are design certified by CSA Laboratories: a) For operation at 160°F. b) To meet all safety and construction requirements of ANSI Z21.10.1/ANSI Z21.10.3. c) As an automatic storage water heater. d) For operation of combustible floors and alcove installations. e) For combination water heating and space heating applications. All models are North Carolina and Massachusetts Code compliant. **Certified for 150 PSI maximum working pressure.**

Ruud Medium Duty

48 to 100-Gallon Capacities
54,000 to 80,000 BTU/h
Natural and LP Gas

See specifications chart on back.

RECOVERY CAPACITIES

Recovery in U.S. Gallons/Hr. (GPH) at various temperature rises

MODEL NUMBER	INPUT (BTU/HR.)	40°F	50°F	60°F	70°F	80°F	90°F	100°F	110°F	120°F	130°F
G50-60N†*	60,000	138	111	92	79	69	61	55	50	46	43

†Meets 40ng/J NOx requirements.

*FVIR Compliant

Recommended Specifications

Water heater(s) shall be model _____, manufactured by Ruud, having gas input of _____ Btu/h and a recovery rate of _____ GPH at a 100°F temperature rise. Water heater(s) shall have a storage capacity of _____ gallons. Water heater(s) shall have the CSA seal of certification and be factory equipped with an CSA/ASME rated temperature and pressure relief valve. Tank(s) shall have a coating of high temperature porcelain enamel and furnished with a magnesium anode rod rigidly supported and a brass drain valve. Water heater(s) shall meet or exceed the energy factor requirements of ASHRAE. Tanks shall have a working pressure rating of 150 psi, and shall be completely factory assembled, including a pressure regulator properly adjusted for operation on _____ gas. Controls will be arranged for safety shutoff in event of pilot failure. Complete unit shall be insulated with rigid polyurethane foam insulation.

In keeping with its policy of continuous progress and product improvement, Ruud reserves the right to make changes without notice.
